Bobrick Introduces Pure Hygiene Solutions: PureDri and PureSphere

Hand dryer and room sanitizer proven to eliminate 99 percent of bacteria, viruses, mold and fungi in less than 10 minutes; ideal for restaurant usage

NORTH HOLLYWOOD, CA, June 21, 2022 – Today, [Bobrick Washroom Equipment, Inc.](#), an industry leader in washroom accessories and toilet partitions, launched the first half of its **Pure Hygiene Solutions** collection – **PureDri** Sanitizing Hand Dryer. Along with **PureSphere** Air Sanitizer, which will be available later this year – each **Pure** product is proven to eliminate 99 percent of bacteria, viruses, mold and fungi in less than 10 minutes, according to a Leeds University research study.

According to Matthew Louchheim, President of Bobrick, “As an industry leader in facility wellness and hygiene, Bobrick has spent the last two years developing products and design solutions to minimize the spread of germs. Our **BobrickPure** products are ideal upgrades to restrooms and common areas because they work continuously to create cleaner, fresher air for everyone.”

Sanitation is vital to restaurant employees and patrons. Visible labeling on **Pure** units — whether in restrooms, dining rooms or kitchens — provides added confidence to patrons and staff, letting them know that extra precautions are being taken to enhance safety and sanitization.

The Science Behind BobrickPure Hygiene Solutions

PureDri and **PureSphere** technology works by destroying existing microorganisms from bacteria and viruses in the air and on surfaces through continuous sanitization using a 3-step process:

1. Eliminates viruses and bacteria via a germicidal UV lamp that inactivates all microorganisms
2. Neutralizes viral particles through strong oxidizing agents as air passes through the chamber
3. Sanitizes using superoxide ions that neutralize airborne particles

The **PureDri** Sanitizing Hand Dryer provides hands with an additional blast of super-concentrated ionized air following the dry time, while providing continuous sanitization in rooms up to 215 square feet.

PureSphere Air Sanitizer continuously purifies the air up to 323 square feet, and is ideal for conference rooms, foyers and work areas. Both products have no filters to change and simple annual bulb replacement.

Bobrick's **PureDri** research findings showed the neutralization of a variety of bacteria and viruses including:

- 100% air disinfection and elimination of E. coli, Staphylococcus aureus and Aspergillus fumigatus after 1 hour
- Surface disinfection and bacteria elimination achieved high results after 8, 24 and 48 hours

"The revolutionary UV+ technology of **PureDri** and **PureSphere** creates hygienic air and surfaces which promote wellness and safety when installed in myriad areas such as washrooms, restaurants, workplaces and classrooms," added Louchheim. "The safety seal that is included with the installation of **PureDri** and **PureSphere** products shows patrons, tenants and employees that they are surrounded by an environment safe from most bacteria and viruses."
