## Washroom Counter Solutions

# SOLUTIONS FOR THE WASHROOM COUNTER

## BOBRICK

Counter mounted soap dispensers are a core part of an easy to maintain, clean, and aesthetically appealing washroom. Dispensers next to sinks eliminate soap and water drips on the counter from hands reaching for soap dispensers mounted on walls or mirrors. Counter mount soap dispensers also free up space on walls and mirrors, thus drawing attention to your design intent.

Bobrick has been a leader in counter-mounted soap dispensers for decades. With millions installed, our B-822 is one of the most popular soap dispensers of the modern era. Today, we offer a variety of solutions to meet your unique facility needs for both image and maintenance on the washroom counter.

### DESIGN

Whatever the design needs of your building, Bobrick has a solution that can meet the demands you have for the look and feel you want for your washrooms, while still delivering on performance.

### DURABLE

Durability is important to Bobrick, especially when it comes to soap dispensers. All of our dispensers are engineered and tested with that in mind and come with a three year warranty. Use this brochure to help select the right level of durability in dispensers that your building requires.

### SUSTAINABLE

By not using cartridges, Bobrick's counter-mounted soap dispensers reduce waste from both the unused soap thrown away in cartridges, and the waste of the cartridges themselves. This can result in up to 57% less post-consumer waste. Our dispensers also give you the freedom to use green soaps.

### ECONOMICAL

With the right soap dispensing system for your counter, your building can realize significant savings on the cost of soap. Universal bulk soap can cost significantly less than proprietary cartridge systems, in some cases up to 80% less.

### LABOR SAVINGS

Dispensers filled from the top of a counter or serviced through a cabinet on the side eliminate the need to remove the panels that are now common underneath washroom counters, greatly reducing the time needed to service a washroom.

## BOBRICK

## STANDARD USE COUNTER

Standard-use washrooms can be found in most building types. They can have great variability in terms of traffic volumes and frequencies, and a need for higher reliability with extended time between servicing. In design, you want a matching look that will hold up over time.

### **NEW:** B-823 SERIES MANUAL FOAM SOAP DISPENSERS

The B-823 series of manual foam counter mounted dispensers is one of Bobrick's newest product lines. The B-823 uses foam non-proprietary bulk soap - even more efficient than liquid. Bulk, jug soap can save as much as 80% in costs versus proprietary soap. The B-823 can also be filled from the top, saving significant servicing time on the need to remove panels beneath the counter. Available with 4" or 6" spouts, and in 34 or 20 ounce capacity.

### B-822 SERIES MANUAL LIQUID SOAP DISPENSERS

The B-822 series from Bobrick has been an industry standard for years. These counter mounted liquid soap dispensers are built to last and be one of the most reliable products in the washroom. The B-822 uses non-proprietary bulk soap like the B-823, but in liquid. The B-822 and B-823 have a chrome finish for design integration with tapware. Available with 4" or 6" spouts, and in 34 or 20 ounce capacity.

### OTHER BOBRICK ACCESSORIES FOR STANDARD USE WASHROOMS

- B-165 Channel Frame Mirrors
- B-3944 Recessed Convertible Paper Towel Dispenser with Waste Receptacle. 12 gallon capacity.

## HEAVY TRAFFIC COUNTER

Heavy use washrooms have their own unique set of circumstances and needs. In buildings such as casinos, airports, schools and stadiums, high volume patterns, durability concerns and vandalism are factors that must be considered for washrooms.

### SUREFLO® TANK-IN-A-BOX SYSTEM

For high traffic washrooms, the Bobrick SureFlo system is an ideal solution. It connects up to five B-822 dispensers to one cabinet, which is loaded with a single box of soap. Servicing time is greatly reduced, and the need to remove panels under the counter is eliminated. The cabinet has a low soap indicator light, as well as a built in reservoir that holds 2 liters of soap. So, even if the box runs out of soap during a high traffic time, there is a significant amount of backup soap to keep the dispensers running until the next service.

The Sureflo system uses a Pink Soap (B-81212), Premium Gold Soap (B-81312) or new Green Soap (B-81412).

### OTHER BOBRICK ACCESSORIES FOR HIGH TRAFFIC WASHROOMS

- B-3974 Automatic, Convertible Roll Towel Dispenser with Waste Receptacle. 18 or 12 gallon waste options.
- B-1658 Channel Framed Mirror with Tempered Glass

Sureflo® Tank-in-a-box System

## NO-TOUCH COUNTER

In certain building types, patrons and tenants desire a more “touchless” washroom with as much of the design incorporating automatic or touch-free dispensers and fixtures as possible. For this building type, Bobrick has solutions to help meet your needs in design and function.

### B-824 AUTOMATIC LIQUID SOAP DISPENSER

Saves costs by using non-proprietary, bulk liquid soap. The B-824 is filled from the top, avoiding moving under counter panels. A portion control dial is used to adjust soap consumption. Auto flush button for the maintenance of unit. Includes battery pack, but can be wired with optional AC adapter. A low-battery indicator light lets building maintenance know when it is time to refresh the batteries. Fiber optic activation creates precise dispensing and reduces false activation.

### NEW: DESIGNER SERIES AUTOMATIC FAUCETS

If you have a hands free dispenser, you need a hands free faucet. The B-8878 is an automatic faucet with a polished chrome finish to match B-824 design and finish.

### OTHER BOBRICK ACCESSORIES FOR NO TOUCH WASHROOMS

- B-3974 Automatic, Convertible Roll Towel Dispenser with 12 gallon Waste Receptacle
- B-290 Welded Frame Mirror

## PRESTIGE COUNTER

For those washrooms demanding that signature look, excellent architectural designs and high quality materials and accessories are of the utmost importance. Bobrick excels in offering products that meet the needs of these unique washrooms with accessories, and now soap dispensers and faucets to match.

### NEW: DESIGNER SERIES SOAP DISPENSERS

Bobrick Designer Series liquid dispensers are ideal for washrooms with the highest design standards. The Designer Series incorporates die-cast zinc tops for a prestigious look in four finish choices (Polished Chrome, Brushed Nickel, Polished Nickel, Polished Brass). They come standard with AC adapters. Other finish options are available subject to longer lead times and minimums.

### NEW: DESIGNER SERIES FAUCETS

To complete the full design of a prestige washroom, Bobrick also offers a series of automatic faucets with finishes that match the Designer Series of Soap dispensers.

### OTHER BOBRICK PRODUCTS FOR PRESTIGE WASHROOMS

- B-3725 ADA Recessed Hand Dryer
- B-167 2436 LED Mirror
