MINIMALIST, YET ROBUST

INTRODUCING THE NEW PRIVADA LATCH

Stainless steel is now standard.

SMART DESIGN

Upon exit, handle returns automatically to the upright position, minimizing patron confusion and damage to the receiving fascia.

VANDAL RESISTANCE

Sacrificial nylon tip breaks off in the event of vandalism, reducing damage to latch and replacement costs. Clear plastic seal protects occupancy indicator finish.

NEW HANDS-FREE LATCH OPTION

Larger surface area allows for elbows and wrists to open and close the latch for a more hygienic experience.

HYGIENIC

Hands-free latch gives patrons the peace of mind they are reducing contact with public surfaces.

EASY TO RETROFIT

Hands-free latch can be retrofitted on installed latches.
